STATE OF NORTH CAROLINA

UNIFORM CRIME REPORT

ANNUAL REPORT

JANUARY — DECEMBER 1978

**COMPILED BY THE
NORTH CAROLINA DEPARTMENT OF JUSTICE
POLICE INFORMATION NETWORK**

PLEASE NOTE

Figures used in this report are submitted voluntarily by law enforcement agencies throughout North Carolina. Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between cities due to the existence of numerous factors which affect the amount and type of crime from place to place. Some of these factors are listed in this report. More valid use can be made of these figures by determining deviations from state averages and through comparisons with averages for cities in similar population groups. It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

ANNUAL REPORT — JANUARY-DECEMBER 1978

RUFUS L. EDMISTEN
Attorney General
State of North Carolina

PREFACE

In recent years our citizenry has experienced an increased social awareness. The problems surrounding the public welfare have become the focal point of the news media and of our conversations with others. Crime, and the violence so often connected with it, is at the forefront of a multitude of social ills. To enable the concerned citizens and criminal justice officials to understand the nature and extent of the crime problem in this State in order for corrective action to be taken, truly reflective criminal statistics are necessary.

Since 1973, a statewide Uniform Crime Reporting Program has been operational in North Carolina. This program is administered by the Police Information Network, a division of the North Carolina Department of Justice, which has a functioning computer system and excellent rapport with the State's local law enforcement agencies.

With the program now six years old we have maintained a high degree of cooperation from local law enforcement officials. I am extremely pleased with the voluntary efforts made to sustain a sound Uniform Crime Reporting System. As a result, this annual report has been compiled and is, in my opinion, a positive step by North Carolina law enforcement community toward a higher degree of professionalism. An increased awareness of the crime problem in this State should additionally serve to advance the total involvement of the entire community in solving the problems before us. To the degree that this report serves to enlighten everyone of the nature and extent of crime in this State, it will have achieved its objectives.

Crime increased in all seven index categories in 1978. Violent crimes as a group increased over two and one half percent. Property crimes as a group increased right under four percent. Combined, the total volume of crime in North Carolina increased three and three-fourths percent over what had been reported in 1977. The statistics contained in this volume represent the "tip of the iceberg" in terms of data our state collects and may now analyze regarding numerous facets of the crime problem. Increasing use of this information and enhancements to the collections of crime data will undoubtedly uncover possible solutions for some portion of the overall problem.

RUFUS L. EDMISTEN
Attorney General

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

Director
Police Information Network

FOREWORD

Since 1973 law enforcement agencies throughout North Carolina have voluntarily submitted information on crimes committed in their areas of responsibility to the Police Information Network (PIN). The information and statistics presented in this report are an assessment of the statewide crime problem and was compiled from the monthly Uniform Crime Reports (UCR) submitted to PIN by North Carolina law enforcement agencies for the year 1978. In turn, PIN has furnished this data to the Federal Bureau of Investigation for tabulation of the national crime figures and inclusion in their annual publication, CRIME IN THE UNITED STATES.

The staff of the Police Information Network has verified the data in this publication for accuracy and completeness to the best of their ability. It is anticipated that this report will assist law enforcement officers in adjusting, if necessary, their efforts in the fight against crime. This report should also provide some valuable information for other interested agencies, both public and private, which have similar goals. I sincerely hope that this publication will prove useful in attempting to curtail the serious problem of crime in our State.

We are constantly seeking ways and means of improving our publication and methods of collecting the data. If you have any suggestions in either area, let us know.

I would like to extend my thanks to all of those law enforcement officials without whose concerted and consistent participation in UCR would not have made this publication possible.

**NORTH CAROLINA POLICE INFORMATION NETWORK
UNIFORM CRIME REPORTING**

**STATEMENT OF POLICY
FOR THE RELEASE OF UCR STATISTICAL INFORMATION**

The following regulations will be observed by this agency concerning the release of Uniform Crime Reporting statistical information. Employees of this agency will observe these procedures and will not deviate from this policy without the express consent of the Director of the Police Information Network. All information to be released will originate from the Police Information Network Criminal Justice Statistics Division and will be approved prior to being released by the Director of the Police Information Network.

REGULATIONS

FOR PUBLISHED DATA:

1. This agency will publish an annual report reflecting crime in North Carolina. This report will be distributed to the Governor, to members of the Legislature, to the Attorney General, to law enforcement agencies or to any agency or committee dedicated to law enforcement or criminal justice work.
2. All UCR data intended for publication will be released to the contributing agencies prior to its being released to individuals or agencies extraneous to the criminal justice community.

FOR UNPUBLISHED DATA:

1. All requests for unpublished information from agencies or individuals should be directed by letter to the Director of the Police Information Network. These special requests will be honored only upon the Director's authorization.
2. Any statistical information not contained in the published annual report may be released via phone, letter, etc., to any interested party only with the written consent of the agency whose statistics are requested.
3. Law enforcement agencies may receive interim, unpublished, specialized reports identifying their agency provided the request is not unreasonable. Law enforcement agencies may also receive their respective county totals as well as any available district or statewide information.

SECTION ONE

NORTH CAROLINA CRIME REPORTING PROGRAM

HISTORICAL BACKGROUND*

The North Carolina Uniform Crime Reporting Program is part of a voluntary national program of collecting crime counts initiated in 1930 by the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP). During that same year, the Federal Bureau of Investigation (FBI) was authorized by the Congress of the United States to serve as the national clearinghouse for crime-related agencies throughout the Nation based upon uniform classification and procedures of reporting.

In an effort to provide as complete a picture of crime in the United States as possible, the Committee on Uniform Crime Records of the IACP chose to obtain data on offenses that became known to police, since greater numbers of these data were available than in any other category of reportable crime information. A meaningful overview of crime was available through examination of seven offenses which were selected because of their seriousness, frequency of occurrence, and likelihood of being reported to police. These offenses, known as the Crime Index offense, are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. To provide nationwide uniformity in the reporting of data, standardized definitions were adopted for all offenses. This standardization was necessary to overcome the variation in definitions of criminal offenses throughout the country.

Reporting agencies are required to submit their data in accordance with the UCR definition of offenses as set forth in Section II of this publication. Because of the variance in punishment for the same offenses in different state codes, there is no possibility in a program such as this to distinguish between felony or misdemeanor crimes.

Contributing agencies to the UCR Program are responsible for compiling and submitting their crime data in one of two means, either directly to the FBI or through state Programs such as that established in North Carolina. Presently, 43 states have operational UCR Programs and others are in various stages of developing such data collection efforts. These state UCR Programs provide the advantages of increased coverage of law enforcement agencies; the provision of more direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them; and through coordination by the state data collection agency, more readily available information for use at the state level. Also, the collection and reporting machinery for the national Program is substantially streamlined.

With the development of a state UCR Program, the FBI ceases collection of data directly from individual law enforcement agencies within the state. Instead, completed information from these agencies is forwarded to the national Program through the state data collection agency (Police Information Network in N.C.).

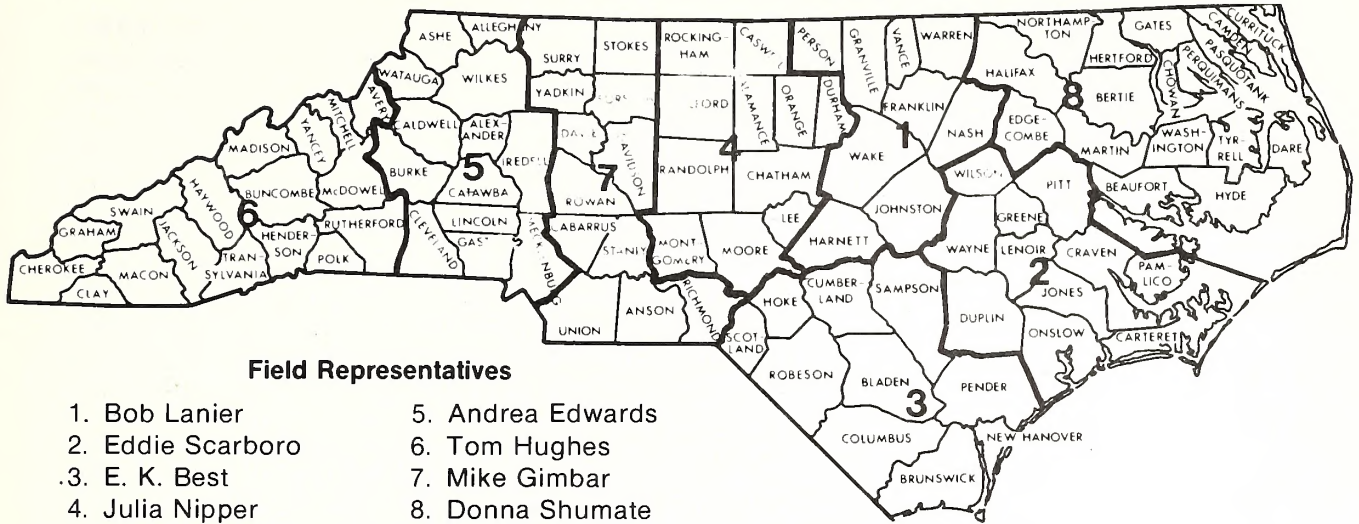

FIELD REPRESENTATION

For Uniform Crime Reporting purposes the Police Information Network divides the State into eight (8) districts. Eight PIN Field Representatives are assigned to assist local agencies in many areas including record practices and crime reporting procedures. The difficult and important task of maintaining close liaison is obvious when it is realized that services now are extended by PIN, through its Field Representatives, to 470 law enforcement agencies of the State. Education of contributors to the program must be a constant operational requirement, if continued system adherence and valid statistics are to be expected.

As an adjunct to the program the Police Information Network offers internal records keeping system assistance to those agencies who request it. Assistance is rendered by the Field Representative who provides the necessary guidance and instruction. The personal contact of the Field Representative and the contributor not only serves as a rapid means to resolve areas of report error, but also provides the Field Representative the opportunity to work in other areas with which the Police Information Network is concerned.

*Crime in the U.S., 1977: FBI, Washington, D.C.

UNIFORM CRIME REPORTING DISTRICTS

CONTRIBUTING AGENCIES AND POPULATION

There are currently an average of 392 law enforcement agencies throughout the State contributing monthly directly to the North Carolina Uniform Crime Reporting Program. Each month approximately 96 out of 100 county Sheriff's Departments and 289 out of 372 Police Departments participate.

In addition, State law enforcement agencies (North Carolina State Bureau of Investigation (SBI), North Carolina State Highway Patrol (SHP), North Carolina State Government Security Force (SGSF), Wildlife Protection Division and several Campus Police Departments submit data to the program. Uniform Crime reports received from these agencies represent statistical data covering approximately 98.01 percent of the estimated North Carolina population.

JANUARY 1, 1978 - December 31, 1978

	Total	Police	Sheriff	SHP	SGSF	SBI	Wildlife	Campus PD's	Pop. Cov.
January	400	296	97	1	1	1	1	3	98.45%
February	400	296	97	1	1	1	1	3	98.48%
March	401	297	97	1	1	1	1	3	98.49%
April	397	294	96	1	1	1	1	3	97.90%
May	393	289	97	1	1	1	1	3	98.29%
June	392	289	96	1	1	1	1	3	97.78%
July	392	288	97	1	1	1	1	3	98.25%
August	392	289	96	1	1	1	1	3	97.79%
September	388	285	96	1	1	1	1	3	97.74%
October	384	281	96	1	1	1	1	3	97.66%
November	386	283	96	1	1	1	1	3	97.63%
December	383	281	96	1	1	1	1	3	97.62%
Average	392	289	96	1	1	1	1	3	98.01%

The above table sets forth the number of agencies by type that have participated in the North Carolina Uniform Crime Reporting Program through December 1978. The State Highway Patrol, Wildlife and State Bureau of Investigation are each counted as one agency even though: A) a monthly report is received from the State Highway Patrol and Wildlife reflecting activity in each county and B) a monthly report is received from each Special Agent of the State Bureau of Investigation.

REPORTING PROCEDURE

In the statewide Uniform Crime Reporting Program contributing law enforcement agencies are wholly responsible for compiling their own crime reports and submitting them to the Police Information Network. The Police Information Network in an effort to maintain quality and uniformity in the data received furnishes full-time field representatives who provide training in Uniform Crime Reporting procedures. All contributors also are furnished with the Uniform Crime Reporting Handbook which outlines in detail procedures for scoring and classifying offenses. The Handbook illustrates and discusses the monthly and annual reporting forms as well as the numerous tally sheets made available to facilitate the periodic tabulation of desired data.

A centralized record system is necessary to the sound operation of any law enforcement agency. The record system is an essential basis for crime reporting by the agency. Upon request the Police Information Network makes internal records forms and technical assistance available at no cost to any law enforcement agency. This provides for the establishment or modification of a basic non-automated police records system.

On a monthly basis, law enforcement agencies (police, sheriffs, Highway Patrol, and State Bureau of Investigation, Wildlife) report the number of offenses that became known to them during the month in the following crime categories: murder and non-negligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny, and motor vehicle theft. This count is taken from a record of all complaints of crime received by the law enforcement agency from victims, other sources, and/or discovered by officers. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in these crime categories is reported to PIN without regard to 1) whether anyone is arrested for the crime; 2) stolen property recovered; 3) the local prosecutive policy; or 4) any other restrictive consideration. Law enforcement agencies on a monthly basis report the total number of these reported crimes which they clear either by arrest or exceptional means. A separate count of crimes cleared which involve only persons under the age of 18 is shown. The number of law enforcement officers killed and assaulted and the value of property stolen and recovered during the month are reported. Arrests are reported for all criminal acts, except traffic violations, by crime category including the age, sex, and race of each person arrested. Supplementary information concerning pertinent data surrounding homicides and rapes is reported. Law enforcement employee data specifically encompasses the number of sworn and other personnel and is collected annually.

VERIFICATION PROCEDURES

An obvious concern in the collection of crime statistics is the validity and uniformity of the data received. With the receipt of monthly reports covering approximately 400 jurisdictions, prepared on a voluntary basis, the problems of attaining uniformity are readily apparent. Issuance of instructions does not complete the role of the Police Information Network. On the contrary, it is standard operating procedure to examine each incoming report not only for arithmetical accuracy but also, and possibly of even more importance, for reasonableness as a possible indication of errors.

Numerous checks and cross checks are used to insure the accuracy of the reports. Errors of a minor nature are corrected by the UCR report verifiers without contacting the contributor. Necessary arithmetical adjustments or unusual variations are noted by the UCR verifiers and brought to the attention of the submitting agency by direct contact through a PIN field representative. Upon resubmission to PIN of a corrected return from a field representative, the forms are re-verified. Upon completion of all individual form verification processes summary statistics in various forms are derived.

A great deal of the success of North Carolina's UCR Program to this point has largely been due to the full time field staff assigned to assist local agencies in record practices and crime reporting procedures. Personal contact is invaluable to the accuracy and uniformity of UCR data received.

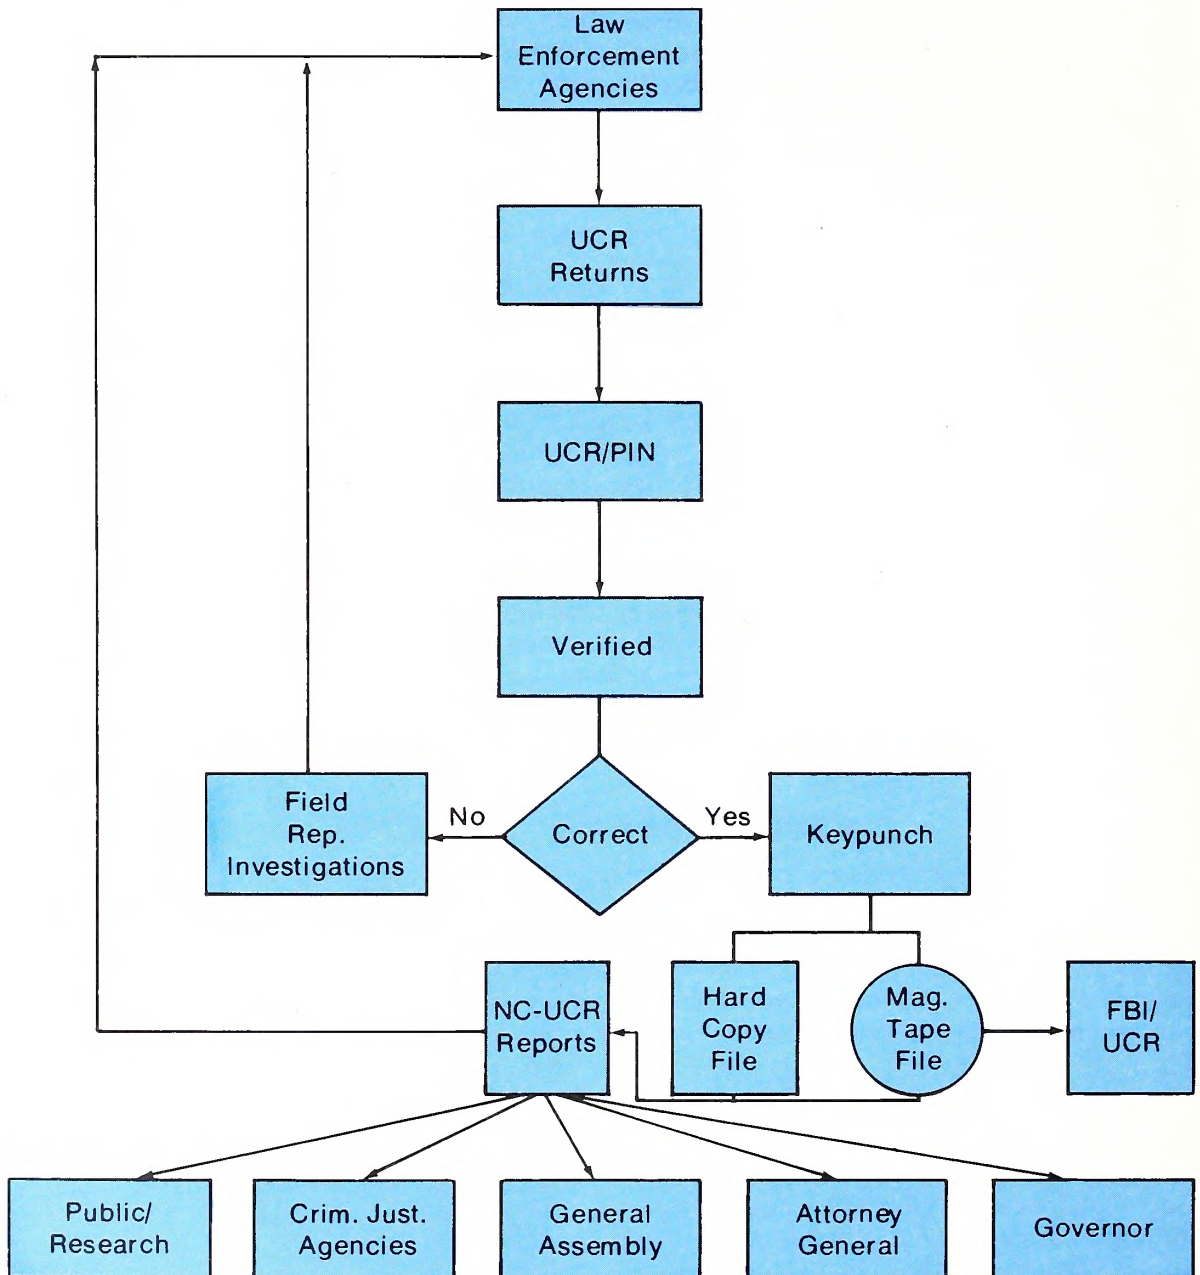

INCIDENT BASE REPORTING

The Police Information Network is currently undertaking the task of developing a statewide Incident Base Reporting System similar to those systems already in operation in several other states. Incident Base Reporting will supplant the current summary form method used for crime reporting in this state, and will, in most part, overcome the limitations of the national UCR system (see next section) by providing PIN detailed offense information on all crimes rather than on just the seven index offenses.

A current timetable calls for PIN to begin testing Incident Base Reporting in the latter part of 1979 with statewide conversion beginning sometime in 1980. This conversion will involve the submission to PIN of all investigation, supplementary investigation, and arrest reports completed by each contributing agency. From these reports, in which the names of all victims, suspects, and arrestees will have been deleted, PIN will extract the data needed to centrally classify and score all offenses and arrests. Obviously, the advent of Incident Base Reporting will dramatically improve the overall uniformity and validity of crime statistics collected by PIN in addition to expanding the current crime data base for future analysis, factors which will benefit the entire law enforcement and criminal justice community in the state of North Carolina.

UCR SYSTEM FLOW

The North Carolina Police Information Network is pleased with the progress of the Uniform Crime Reporting Program to this point notwithstanding the fact that there are many challenges yet to be met. The UCR staff is working vigorously toward achieving a program of excellence in terms of the quality of data submitted, the jurisdiction coverage represented, and the value of meaningful statistical feedback and interpretation. To this end the UCR program is committed.

SECTION TWO

CONSIDERATIONS FOR INTERPRETATION

UCR LIMITATIONS

N.C. UCR PROGRAM. Information currently collected by the North Carolina Program is generally the same as that gathered by the national system, and the methods of classifying and scoring (counting) offenses and arrests are the same. This readily enables comparisons with other states and the Nation (see National Crime Rate Tables in Section VII), but the information gaps present in the national program are also inherent in North Carolina's system.

PRIMARY PURPOSE. The Uniform Crime Reporting Program has been subject to much criticism during its history and, while many of these commentaries have been valid, at least some of the shortcomings are understandable when it is remembered that the program has been developed to furnish management information for use primarily by law enforcement agencies. The Uniform Crime Reports are not a court or corrections statistical program. They are not designed to furnish an overview of the workings of our entire criminal justice system, nor are they able to give the complete picture of law enforcement activity. The main goal of the UCR Program is to furnish police administrators with a measure of their activities and operational problems as indicated by the number of reported offenses, arrests, clearances, and the like.

Therefore, much of the criticism of the UCR Program itself is weakened when its stated purpose is kept in mind. Uniform Crime Reports data are the best crime information currently available since they reflect the key events (criminal offenses) that set in motion the various phases of our criminal justice process. The number of arrests, prosecutions, or convictions, while capable of more precise measurement, nevertheless is less indicative of the amount and nature of crime because such data is further removed from the original event. But, because the Uniform Crime Reporting Program is the only recurring crime and arrest reporting program operating on a national level, of necessity it serves as the base for assessing the many significant information gaps at the input end of the criminal justice system.

TYPE DATA COLLECTED. A first step in the control of crime is to ascertain the true dimensions of the problem. However, present statistics as gathered by the UCR Program measure neither the real incidence of crime nor the full amount of economic loss to victims. Information regarding number of offenses and clearances is collected only for the seven Part 1 crimes. (The collection of the number of reported offenses of arson has been added to the UCR Program for 1979.) Value and type property stolen and recovered data is requested only for property stolen in Part 1 offenses. For the Part 2 offenses (except non-aggravated assault), the only information submitted is the number of arrests for these crimes according to the age, sex, and race of the subject. Consequently, there is no record of the actual number of these offenses occurring, nor is there a calculation made for property loss, as in cases of vandalism, embezzlement, etc.

Moreover, the broad categorization of this data does not allow an examination of the number of offenses reported nor the arrests made for such offenses as spouse abuse, the writing of worthless checks, and kidnapping. The number of these particular offenses or arrests, as well as others, are included in such general categories as Assault, Fraud, and All Other Offenses.

Although some victimization data is collected in the offense categories of Homicide and Rape, there is no record of the victims of robbery, assault, burglary, and the rest of the UCR Part 1 and 2 offenses.

DEGREE OF SERIOUSNESS. The Crime Index does not explicitly take into account the varying degrees of seriousness of its seven components. Each crime receives the same weight as it is added to the Index. Consequently, an auto theft is counted the same as a murder, and an aggravated assault is weighted equally with an attempted burglary. Any review of crime must consider the volume, rate, and trend of each offense that comprises the Index and the relationship between these seven crimes.

UCR CLASSIFICATION AND SCORING PROCEDURES. The North Carolina and national Uniform Crime Reporting Programs are designed to measure offenses committed and persons arrested, and difficulty can arise if this distinction is not kept firmly in mind. Crimes relate to events, but arrests relate to persons. The classifying and scoring of one robbery, for instance, could involve several offenders, several victims, and even the commission of other offenses which would go unreported for UCR purposes (See Scoring of Offenses in this Section).

Even more of the total crime picture is lost when arrests are scored. UCR counts only the number of people arrested and not the number of charges per person. Clearly, one arrest could involve any number of different or similar charges against one offender.

VALUE OF PROPERTY STOLEN AND RECOVERED. Undoubtedly, the data received on the value of property stolen and recovered must be viewed with a certain amount of skepticism. The UCR methods of valuing stolen property involve the acceptance of the victim's evaluation in most instances, and exaggeration of these figures is quite possible. Furthermore, UCR uses the market value at the time of recovery and oftentimes this is less than at the time the property was stolen. The percentage of property recovered should be viewed with these facts in mind.

What effect the recent soaring rates of inflation may be having on this data along with other hair-splitting factors are impossible to calculate making this data an estimate at best.

JUVENILE CRIME DATA. Juvenile crime and arrest statistics are also open to question. Many juvenile offenders are handled informally and, as a consequence, inaccurate or incomplete recording of the event or action may result. Procedures for handling juveniles vary between departments much more so than in the case of adult offenders. Furthermore, the degree of juvenile involvement in solved offenses is probably seriously misunderstood because juvenile participation in clearances is recorded only when juveniles are exclusively involved. When both adults and juveniles are subjects in a clearance, the juvenile participation is not reported.

REPORTING VARIATIONS. North Carolina now receives Uniform Crime Reports from nearly 400 law enforcement agencies monthly. Because the number of reporting agencies is so large, one must be aware that unintentional variations from UCR guidelines may occur that would affect the validity of the data presented here. Municipal ordinances, local criminal justice administrative policies, efficiency and thoroughness of record keeping, and Uniform Crime Reporting proficiency and practices all affect the amount of crime and arrests reported. Furthermore, socio-economic conditions and the characteristics and attitudes of the local population influence the magnitude and nature of criminal behavior in a community.

CONCLUSION. The preceding comments should not be viewed as an indictment of the Uniform Crime Reporting Program which, admittedly, is designed for the operational requirements of law enforcement agencies. While current methods of gathering and reporting crime and arrest data provide a less than complete picture of criminality in our society, there is at present no other information system in general use that will more adequately perform this task. Many of the same criticisms may be equally applied to existing court and penal statistical information systems. For, in actuality, consistent data is not available with which to accurately assess the operation and problems of our criminal justice system. Deficiencies in information are apparent: the passage of time cannot be accounted for, and hence the degree of economy and swift justice cannot be measured; the true degree of recidivism, or recurring criminal behavior, cannot be measured. Lacking data concerning dispositions at various levels of the criminal justice system or the number of subjects passed through succeeding legal statutes, the efficiency of the process cannot be realistically evaluated. However, these information gaps will never be surmounted if we continue to view our "police", "judicial", and "correctional" statistical information systems as independent from each other. What is required is a "criminal justice" information system, with the offender passing through the criminal justice process being the unit about which all data is gathered

CLASSIFICATION OF OFFENSES

UCR divides offenses into two major classifications which are designated Part 1 and Part 2 offenses. This distinction is important to keep in mind because different information is collected for each. Part 1 offenses include 1) Violent Crimes: murder and non-negligent manslaughter, negligent manslaughter, forcible rape, robbery and aggravated assault; and 2) Property Crimes: burglary, larceny (theft) and motor vehicle theft. All other offenses are classified under Part 2 (see Offense Definitions in this section).

The Part 1 offenses, excluding negligent manslaughter, are used to calculate the Crime Index and Crime Rate (see The Index of Crime in the next section and Crime Rates in this one).

All offenses are classified on the basis of law enforcement officer investigation in accordance with UCR offense definitions (which will not necessarily coincide with N.C. statute definitions). Because UCR identifies a police problem, offense classifications are not based on the findings of a court, coroner, jury or decision of a prosecutor.

SCORING OF OFFENSES

Only the number of those offenses for Part 1 crimes and simple assault are scored (counted) for UCR (the collection of reported arson offenses has been added to the UCR Program for 1979). The method of scoring varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, negligent manslaughter, rape, and aggravated and simple assault, one offense is scored for each victim, regardless of the number of offenders involved. For example, three offenders could be involved in the murder of one victim, and in this case one murder would be scored.

For robbery and larceny, one offense is counted for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if 10 people are robbed in a bar at the same time, only one offense is counted. However, if that robber then leaves the bar and holds up a passerby, a second offense has occurred and would be scored.

For burglary, one offense is counted for each "structure" which is illegally entered. For UCR purposes, a "structure" is generally defined as an enclosed, permanently occupied area. The illegal entries for the purpose of committing a felony or theft of such structures as dwelling houses, garages, offices, barns, and the like are considered burglaries, and one burglary is scored for each separate unit entered. The illegal entry of those structures used to house transients such as hotel or motel rooms is scored as one burglary regardless of the number of these rooms that have been entered.

For motor vehicle theft, one offense is counted for each vehicle stolen. For UCR purposes, a motor vehicle is defined as any self-propelled vehicle that runs on the surface and not on rails or a body of water. Thefts of farm and construction equipment are excluded from this definition and are scored as larcenies.

Additionally, any attempts to commit any of the above are also counted as offenses with the exception of attempts or assaults to kill which are classified and scored under aggravated assault.

For multiple offenses that occur in one crime incident (at the same "time and place"), only the most serious offense is counted. Part 1 crimes are ranked according to seriousness and appear in order from most serious to least serious (see order of crimes in Offense Definitions in this section). For example, a robber may seize a man's wallet and then beat him causing serious injury. Both a robbery and an aggravated assault have occurred, but because robbery is considered by UCR to be more serious, only the robbery is scored. From one perspective, this method of counting seriously understates the crime problem, but from another, it prevents undue inflation of crime statistics. Part 2 offenses that occur in combination with Part 1 offenses or by themselves are not counted.

CLEARANCES

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved. Offenses may also be cleared by exceptional means when the offender: commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; or when the victim refuses to prosecute or another jurisdiction refuses to extradite.

Clearances are counted as either "adult" or "juvenile". A "juvenile" clearance is counted only when juveniles are involved exclusively in the commission and clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance.

When examining clearance data keep in mind that not all crimes are cleared within the calendar year in which the offense occurs. Also note that the recovery of property stolen with regard to a specific offense does not by itself constitute a clearance for UCR purposes.

PROPERTY STOLEN AND RECOVERED

The figures for value of property stolen and recovered report the value at each point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore recovery value does not necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine law enforcement effectiveness in recovering stolen goods. Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that recovered property may have been stolen in a previous year. In addition, the type and value of stolen or recovered property is reported only for Part 1 offenses and does not include property losses suffered as a result of the commission of any Part 2 offenses such as fraud or embezzlement.

As was stated in the part on UCR LIMITATIONS, these values are affected by many variables and must be considered estimates at best. It is sometimes difficult to trace the recovery of some stolen property back to the offense or even the departmental jurisdiction in which the theft occurred. This coupled with the fact that the market value at the time of recovery is used instead of at the time of the theft should prompt cautious analysis of this data.

ARRESTS

Arrest information is collected for all Part 1 and Part 2 offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all the offenders who have been arrested even if several were involved in the commission of a singular offense. Therefore, arrest and clearance totals will be equal only by coincidence.

It should be kept in mind that arrest totals are not indicative of the number of different people involved in the commission of crime. A total of three arrests may represent the arrest of three different people or the arrest of the same person on three different occasions. Moreover, arrest totals also do not indicate the number of charges placed against an individual at the time of arrest.

***CRIME RATES**

The Crime Rate is based on the Crime Index, but adjusts the Index for variances in population by indicating the number of Index offenses for each 100,000 persons. This means that comparisons may be made among several areas with different populations, or within one area with different populations over a period of time, without the information being biased by population differences. For most general comparisons, the Crime Rate is probably the most accurate figure to use.**

Obviously, one of the most important variables involved in calculating a crime rate is the total population figure. Assessing the population coverage of any law enforcement jurisdiction eight years past a general statewide census is no easy task. It is further complicated when city/county estimates are received that include areas not within a particular jurisdiction. For instance, a population estimate received from the N.C. Department of Administration for the city of Chapel Hill would include those residents who live on the campus of the University of North Carolina located in that city. Since, in this case, the Chapel Hill Police Department does not include in their crime reporting any offenses that occur on this campus, the entire campus resident population has been subtracted from the population estimate received from the Department of Administration. Similarly, population adjustments for other non-jurisdictional areas such as military bases have been made statewide when necessary.

The amount and rate of crime for a particular community can sometimes be quite deceiving unless several factors are taken into consideration. Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

**Crime in Ohio, 1977; Ohio BCI

1. Density and size of the community population and metropolitan areas of which it is a part.
2. Composition of the population with reference particularly to age, sex, and race.
3. Economic status and mores of the population.
4. Relative stability of population including commuters, seasonal, and other transient types.
5. Climate, including seasonal weather conditions.
6. Educational, recreational, and religious characteristics.
7. EFFECTIVE STRENGTH OF THE POLICE FORCE.
8. STANDARDS GOVERNING APPOINTMENT TO THE POLICE FORCE.
9. POLICIES OF THE PROSECUTING OFFICIALS AND THE COURTS.
10. ATTITUDE OF THE PUBLIC TOWARDS LAW AND ENFORCEMENT PROBLEMS.
11. THE ADMINISTRATIVE AND INVESTIGATIVE EFFICIENCY OF THE LOCAL LAW ENFORCEMENT AGENCY INCLUDING THE DEGREE OF ADHERENCE TO CRIME STANDARDS.

In several instances the Police Information Network has refrained from calculating a crime rate for a particular area. Where the crime rate should appear an "N.A." (Not Applicable) may have been placed instead for a variety of reasons. Crime rates have not been calculated for any jurisdiction in which the presiding law enforcement agency submitted less than 12 months' reports to PIN. Seasonal variations in crime occur to the extent that estimates or projections for a full year would in some cases cause for unfair or invalid comparisons. In some instances, 12 months' reports have been received, but the reporting procedures followed by that particular agency have been established as in such variance with standard UCR classification and scoring procedures as to render their data invalid for crime rate calculation purposes. For these reasons, the crime rates for several communities and even counties have been omitted from various maps and tables throughout this publication.

*The actual method used to calculate the Crime Rate along with other pertinent information can be found in Section 7.

INFORMATION GROUPING

The crime statistics reported by an individual agency indicate what is happening in one particular area, but to make valid comparisons among a number of jurisdictions, communities with similar characteristics need to be grouped together. It may be important to know how a city compares with cities of similar size, or how patterns of crime differ in various types of communities. Grouping agencies with similar characteristics allows these determinations to be made. Aside from being merely interesting, such comparative analysis provides the basic information for long-range criminal justice planning.*

Since grouping by population size considers only the population of the relevant jurisdiction without regard to the urban/rural character of the area, further categorization is needed in order to make a more valid comparison. The concept of a Standard Metropolitan Statistical Area (SMSA) is a widely accepted one, and the one that has been chosen for the population grouping tables in Section Seven of this publication. Not only does it take into account a wide range of populations, but it also considers those factors which go into defining an area as either urban or rural.

Surely, no system of grouping communities is without its imperfections, and the SMSA classifications are no exception. Those familiar with the State of North Carolina may be somewhat surprised to find their hometown or favorite city designated as urban rather than rural or vice-versa; even so, the criteria for SMSA classifications is a sound one and is controlled by the Office of Statistical Standards in the U.S. Office of Management and Budget.

*Crime in Ohio, 1977: Ohio BCI

Each SMSA must include at least: a. One city with 50,000 or more inhabitants, or b. A city having a population of at least 25,000 which, with the addition of the population of contiguous places, incorporated or unincorporated, which have a population density of at least 1,000 persons per square mile, and which together constitute for general economic and social purposes, a single community with a combined population of at least 50,000, provided that the county or counties in which the city and contiguous places are located has a total of at least 75,000. A contiguous county will be included in a SMSA if: a. At least 75% of the resident labor force in the county is in the non-agricultural labor force, and b. At least 30% of the employed workers living in the county work in the central county or counties of the area.

The following is an outline of the population and community type groupings used in this publication:

Population Groupings

<u>Group</u>	<u>Population</u>
1	50,000 and Over
2	25,000 - 50,000
3	10,000 - 25,000
4	5,000 - 10,000
5	Under 5,000

Community Types

Core City: Any city with a population of 50,000 or more that is within a SMSA.

Example: Charlotte, Wilmington, etc.

Suburban City: Any city that is within a SMSA exclusive of the core cities.

Example: Burlington, Cary, etc.

Rural City: Any city that is outside a SMSA.

Example: Greenville, Nags Head, etc.

Suburban County: Any county that is within a SMSA.

Example: Guilford, Cumberland, etc.

Rural County: Any county that is outside a SMSA.

Example: Pitt, Avery, etc.

OFFENSE DEFINITIONS

PART 1 OFFENSES

CRIMINAL HOMICIDE:

a. **Murder and Non-negligent Manslaughter:**

The willful, non-negligent killing of one person by another. Excludes attempts or assaults to kill (classified as aggravated assault), suicide, and accidental deaths. The killing of a felon by a private citizen or the killing of a felon by a police officer in the line of duty are considered justifiable homicides by UCR and are excluded from this count.

b. **Negligent Manslaughter:**

The killing of another person through gross negligence. Traffic fatalities are not counted.

RAPE:

The carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

ROBBERY:

The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

AGGRAVATED ASSAULT:

The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Simple assaults are excluded from this count.

BURGLARY:

The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to: dwelling houses, apartments, out buildings, public buildings, offices, factories, barns, cabins, etc.

LARCENY:

The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This includes crimes such as shoplifting, purse snatching, pocket picking, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is excluded from this category inasmuch as it is separate Part 1 offense.

MOTOR VEHICLE THEFT:

The unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

UCR defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motorcycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larcenies.

PART 2 OFFENSES

OTHER (SIMPLE) ASSAULTS:

An unlawful attack or attempted attack upon another which does not result in serious injury to the victim and which does not involve the use of a dangerous weapon.

ARSON:

The willful or malicious burning of property with or without the intent to defraud. Includes attempts.

FORGERY AND COUNTERFEITING:

The making, altering, using or possession, with intent to defraud, of anything false which is made to appear true. Includes attempts.

FRAUD:

Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks, confidence games, illegal conversion of services, etc., except forgeries and counterfeiting.

EMBEZZLEMENT:

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control. Includes larceny from employer.

STOLEN PROPERTY:

The buying, receiving, and possessing of stolen property, or the attempt to do so.

VANDALISM:

The willful or malicious destruction, injury, disfigurement or defacement of real or personal property without the consent of the owner or person having custody or control. Includes attempts.

WEAPONS:

All violations or regulations or statutes that control carrying, using, possessing, furnishing, and manufacturing deadly weapons or silencers. Includes attempts.

PROSTITUTION AND COMMERCIALIZED VICE:

Sex offenses and attempted sex offenses of a commercialized nature. Includes prostitution, keeping houses of ill fame, pandering, detaining women for immoral purposes, etc.

ALL OTHER SEX OFFENSES:

All other offenses against common decency and morals. Includes statutory rape (without force) and all other sex offenses not previously defined.

DRUG LAWS:

The unlawful possession, sale, use, growth or manufacture of controlled substances. For UCR purposes these offenses are broken down into four subcategories: a. Opium or cocaine and their derivatives (morphine, heroin, codeine), b. Marijuana, c. Synthetic narcotics — manufactured narcotics which can cause true drug addition, d. Dangerous non-narcotic drugs.

GAMBLING:

Promoting, permitting or engaging in illegal gambling. Includes bookmaking, numbers and lottery, etc.

OFFENSES AGAINST THE FAMILY OR CHILDREN:

All charges of nonsupport and neglect or abuse of family or children. Note: Most child abuse, especially that resulting in injury, has been classified as either simple or aggravated assault.

DRIVING UNDER THE INFLUENCE:

Operating any motor vehicle or common carrier while under the influence of liquor or drugs.

LIQUOR LAWS:

Violation of state or local regulatory laws. Includes sale to minors and drinking on a public conveyance. This category excludes Driving Under the Influence and Drunk and Disorderly violations.

DRUNKENNESS:

Note: Although this publication lists arrests for public drunkenness, the State of North Carolina decriminalized this offense during the course of 1978. Beginning in October of 1978 all arrests for the charge of Drunk and Disorderly were classified as Disorderly Conduct.

DISORDERLY CONDUCT:

Breaching the peace or attempting to do so. Includes violations of disturbing the peace, unlawful assembly, and drunk and disorderly.

VAGRANCY:

Violation of state or local statutes pertaining to being a "suspicious character or person", vagrancy, etc.

ALL OTHER OFFENSES:

All violations of state or local regulatory laws except traffic offenses and offenses defined above or below. Includes kidnapping, extortion, trespass, etc.

CURFEW AND LOITERING LAWS:

Juvenile violations of local curfew and loitering ordinances.

RUNAWAY-(JUVENILES):

The unlawful truancy from a legal place of residence by a juvenile.

SECTION THREE

N.C. CRIME INDEX DATA

STATEWIDE CRIME SUMMARY

1978

- **INDEX OFFENSES.** A total of 212,703 index crimes were reported to law enforcement in North Carolina during 1978, a 3.76% increase over 1977.
- **CRIME RATE.** There were 3,956 victims for every 100,000 permanent inhabitants of the state, an increase of nearly 5.70% over 1977.
- **VIOLENT CRIMES.** A total of 22,728 violent crimes were reported statewide, an increase of 2.73% over 1977.
- **PROPERTY CRIMES.** A total of 189,975 property crimes were reported, an increase of 3.88% over 1977.
- **MURDER.** A total of 593 murders were reported reflecting a 3.67% increase over 1977.
- **RAPE.** A total of 1,006 rapes were reported, the largest single percentage increase (9.47%) of any index offense over 1977.
- **ROBBERY.** A total of 3,634 robberies were reported, an increase of 8.87% over 1977.
- **AGGRAVATED ASSAULT.** A total of 17,495 aggravated assaults were reported, an increase of 1.15% over 1977.
- **BURGLARY.** A total of 64,848 burglaries were reported, an increase of 4.24% over 1977.
- **LARCENY.** A total of 114,069 larcenies were reported, an increase of 3.43% over 1977. Over 50% of the total number of index offenses were in this category.
- **MOTOR VEHICLE THEFT.** A total of 11,058 motor vehicle thefts were reported, an increase of 6.44% over 1977.
- **CLEARANCE RATE.** A total of 56,499 index offenses were cleared by arrest or exceptional means. Only 26.56% of the total reported offenses were cleared in 1978 compared to 27.62% in 1977.

THE INDEX OF CRIME

The crime index offense table can be used to indicate the probable extent, fluctuation, and distribution of crime for the State of North Carolina as a whole, geographic divisions, individual counties, individual cities and towns, and standard metropolitan statistical areas. The measure used is a Crime Index consisting of seven important offenses which are counted as they become known to the law enforcement agencies. Crime classifications used in the Index are: Murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary—breaking and entering, larceny and motor vehicle theft.

The total number of criminal acts that occur is unknown, but those that are reported to Law Enforcement provide the first means of a count. Not all crimes come readily to the attention of Law Enforcement; not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur with enough regularity to be meaningful in an index. The bullseye below sets forth hypothetical percentages of crime information that are derived from various sources, and, in so doing, highlights the importance of the statistics contained in this volume.

1978 CRIME INDEX OFFENSES BY MONTH

	Murder	Rape	Robbery	Agg. Assault	Burglary	Larceny	MV Theft
January	42	60	357	1,271	5,512	8,365	805

NORTH CAROLINA CRIME CLOCK

NORTH CAROLINA CRIME CLOCKS

NORTH CAROLINA CRIME CLOCKS

MURDER

DEFINITION

Murder is defined as the willful (nonnegligent) killing of another. The classification of this offense, as in all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body.

Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to murder or assaults to murder are scored as aggravated assaults and not as murder.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Uniform Crime Reporting Program, is the carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

In any instance of rape, one offense is counted for each person raped or upon whom an assault to rape or attempt to rape has been made.

TREND

<u>Year</u>	<u>No. of offenses</u>	<u>Rate per 100,000</u>

FORCIBLE RAPE

During 1978 the Police Information Network collected supplementary information about the offense of rape. During this period there were 733 actual rapes reported as well as an additional 273 attempted rapes. The following statistics have been compiled in an effort to provide criminal justice agencies with more insight into the offense of rape.

ACTUAL RAPES — VICTIM

Distribution of Intra - Interracial Rapes — Actual

CATEGORY	NUMBER	% DISTRIBUTION

ROBBERY

DEFINITION

Robbery is defined as the taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear. The crime of robbery is a vicious type of theft which takes place in the presence of the victim.

In any instance of robbery, one offense is counted for each distinct operation without regard to the number of persons robbed or the number of persons committing the crime.

TREND

<u>Year</u>	<u>No. of offenses</u>	<u>Rate per 100,000</u>
1977	3,338	61.45

Total	3,634	100.00	\$1,425,562	\$ 392

* Present UCR classification and scoring procedures prevent a precise measurement of these classifications and their corresponding values (see Scoring of Offenses in Section 2). Further, the total value stolen often cannot be determined at the time of police investigation. This is especially true with regard to bank robbery (compare the bank robbery statistics in this table with those provided by the FBI on page 49).

BANK CRIME STATISTICS

During 1978 North Carolina was the victim of forty-eight bank robberies, a decrease of nearly 13 percent over 1977. Bank robbery has decreased nearly 40 percent since 1976 in North Carolina.*

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is defined as the unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

BURGLARY

BURGLARY

DEFINITION

Burglary is defined as the unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary in the Uniform Crime Reporting Program. The offense of burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to: dwelling house, apartment, out buildings, public buildings, offices, factories, etc.

LARCENY

DEFINITION

Larceny-theft is defined as the unlawful taking or stealing of property or articles without the use of force, violence, or fraud. It includes crime such as shoplifting, purse-snatching, pocket-picking; thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft, of course, is excluded from this category inasmuch as it is a separate Crime Index offense.

MOTOR VEHICLE THEFT

DEFINITION

Motor vehicle theft is defined as the unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

The Uniform Crime Reporting Program defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motor-cycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larceny-thefts.

11,058	\$27,515,974	\$2,488

*Motor vehicles that were stolen in conjunction with a more "serious" index offense such as robbery or burglary are not included in this count. This count represents only those instances in which motor vehicle theft was the only or most "serious" offense committed. The total value shown here reflects the value of all property stolen during the commission of the offense (i.e., not just the value of each vehicle).

A map of North Carolina showing its 100 counties. The 47 counties that were part of the original 1776 boundaries (the 'Old North State') are shaded in yellow. These counties are: Alleghany, Ashe, Avery, Beaufort, Bertie, Bladen, Brunswick, Cabarrus, Caldwell, Caswell, Carteret, Cherokee, Clay, Columbus, Currituck, Dare, Davidson, DeWitt, Duplin, Edgecombe, Forsyth, Franklin, Gaston, Gates, Guilford, Halifax, Harnett, Henderson, Hertford, Hyde, Johnston, Jones, Lincoln, Lenoir, Madison, Martin, McDowell, Mecklenburg, Mitchell, Montgomerie, Moore, Nash, New Hanover, Onslow, Orange, Person, Pettigrew, Polk, Randolph, Robeson, Rockingham, Rowan, Sampson, Scotland, Surry, Swain, Tazewell, Tyrone, Vance, Warren, Wayne, Wake, Wilkes, and Wilson. The 53 counties that were added to the state after 1776 are shown in white. These include: Alamance, Anson, Beaufort, Bertie, Bladen, Brunswick, Cabarrus, Caldwell, Caswell, Carteret, Cherokee, Clay, Columbus, Currituck, Dare, Davidson, DeWitt, Duplin, Edgecombe, Forsyth, Franklin, Gaston, Gates, Guilford, Halifax, Harnett, Henderson, Hertford, Hyde, Johnston, Jones, Lincoln, Lenoir, Madison, Martin, McDowell, Mecklenburg, Mitchell, Montgomerie, Moore, Nash, New Hanover, Onslow, Orange, Person, Pettigrew, Polk, Randolph, Robeson, Rockingham, Rowan, Sampson, Scotland, Surry, Swain, Tazewell, Tyrone, Vance, Warren, Wayne, Wake, Wilkes, and Wilson.

SECTION FOUR

N.C. PROPERTY CRIME DATA

**STATE OF NORTH CAROLINA
1978, VALUE OF PROPERTY STOLEN AND RECOVERED
BY MONTH**

The table below indicates by month and value of property reported stolen and recovered during 1978. The total value of property reported stolen in North Carolina in 1978 was \$76,826,537.

Although law enforcement agencies recovered approximately 35 percent of the property stolen the net loss was still in excess of \$27 million dollars.

December had the largest value of property stolen in a single month in 1978 and also the lowest recovery rate.

VALUE OF PROPERTY STOLEN AND RECOVERED

Month	Stolen	Recovered	Percent
January	\$ 5,700,969	\$ 1,945,091	34.12
February	\$ 5,419,843	\$ 2,043,732	37.71
March	\$ 6,051,464	\$ 2,145,385	35.45
April	\$ 5,342,465	\$ 2,006,443	37.56
May	\$ 5,954,847	\$ 2,151,203	36.13
June	\$ 6,071,479	\$ 2,107,980	34.72
July	\$ 6,532,770	\$ 2,361,799	36.15
August	\$ 6,708,647	\$ 2,354,556	35.10
September	\$ 6,632,134	\$ 2,273,945	34.29
October	\$ 7,315,102	\$ 2,690,072	36.77
November	\$ 7,126,101	\$ 2,393,785	33.59
December	\$ 7,970,716	\$ 2,575,406	32.31
Total	\$76,826,537	\$27,049,397	35.20
Monthly Average	\$ 6,402,211	\$ 2,254,116	35.20

For classifying and scoring purposes the seven Crime Index Offenses are grouped into two categories—crimes against persons and crimes against property. Crimes against persons include murder, rape, and aggravated assault. Crime against property include robbery, burglary, larceny and motor vehicle theft. Supplemental data relating to these property crimes is collected and analyzed on a monthly basis. The resulting figures provide information concerning the value of property stolen and recovered, the various types of property stolen and the value of property stolen by offense category.

VALUE OF PROPERTY STOLEN AND RECOVERED BY MONTH — 1978 vs. 1977

STATE OF NORTH CAROLINA

NORTH CAROLINA ARREST DATA

The following pages reflect the number of arrests made by county for 1977 and 1978. Highway Patrol arrest data was not available by county, and therefore the arrests made by this agency in 1977 (45,532) and 1978 (49,668) are not reflected in each of the county totals. The breakdown of this data was available statewide and is included in the totals below.

Statewide

Offense Category	1977	1978	Percent Change

DRUG ARREST

IN

NORTH CAROLINA

NARCOTICS PRICE INDEX

The table below reflects the current market value of some of North Carolina's most used controlled substances. These prices may vary from area to area due largely to the basic law of "Supply and Demand". The table below was furnished by the North Carolina State Bureau of Investigation.

Drug Name	Price Per Unit
Marijuana	\$20.00 per oz., \$320.00 per lb.
Hash	\$ 7.00 per gram, \$100.00 per oz.
Heroin	\$20.00 per bag (100 mg), \$150.00 per gram
Cocaine	\$90.00 per gram
Morphine	\$15.00 per d.u.*
LSD	\$ 3.00 per d.u.*
Preludin	\$15.00 per d.u.*
Dilaudid	\$35.00 per d.u.*
PCP	\$ 5.00 per d.u.* (100 mg), \$1800.00 per oz.
Valium	\$ 1.25 per d.u.*
MDA	\$10.00 per d.u.* (100 mg), \$35.00 per gram
Prescribed Amphetamines	\$ 2.00 per d.u.*
Clandestine Amphetamines	\$50.00 per gram, \$1300.00 per oz.
Barbituates	\$ 1.50 per d.u.*

*d.u.—dosage unit: this measurement is the common measure of the particular drug such as one capsule, or one tablet.

Other Dangerous Drugs—Sales	91	32	123
SALES—TOTAL	4,045	530	4,575
Opium Cocaine—Possession	464	141	605
Marijuana—Possession	7,656	1,091	8,747
Synthetic Narcotic—Possession	391	96	487
Other Dangerous Drugs—Possession	356	82	438
POSSESSION—TOTAL	8,867	1,410	10,277
GRAND TOTAL	12,912	1,940	14,852

* Although this arrest breakdown is correct insofar as it reflects the statewide narcotics data as it was received by PIN, please note that the internal records keeping practices of several N.C. law enforcement agencies prevent the reporting of drug arrests strictly under the category of "sales." In these instances the departments have reported all their arrests (manufacture, sale, etc.) in the subcategory of "possession" thereby slightly inflating this sub-categorization total statewide.

*RACE OF OFFENDERS

Category	White	Negro	Indian	Chinese	Japanese	All Other
Opium Cocaine etc.—Sales	283	180	1	1	0	1
Marijuana—Sales	1,696	452	55	2	3	3
Synthetic Narcotic—Sales	253	44	2	0	0	1

NORTH CAROLINA LAW ENFORCEMENT OFFICERS ASSAULTED BY MONTH

1978 vs. 1977

TYPE OF ASSIGNMENT

During 1978 68 percent of all assaults on officers occurred while the officer was assigned to a one man vehicle, alone or assisted.

Type of Assignment	Number	% Distribution
Two-Man Vehicle	292	17.00
One-Man Vehicle		
Alone	598	34.81
Assisted	570	33.18
Detective		
Alone	13	0.76
Assisted	51	2.97
Other		
Alone	81	4.71
Assisted	113	6.58

OFFICER ASSAULTS BY TIME OF DAY

TIME OF ASSAULT

Approximately one-half of the assaults on officers occurred during the hours from 8 p.m. and 2 a.m. The period with greatest incidence was from 10 p.m. to 12 p.m. (17.8%).

Time Period	Number	% Distribution
12 a.m.- 2 a.m.	276	16.07
2 a.m.- 4 a.m.	160	9.31
4 a.m.- 6 a.m.	47	2.74
6 a.m.- 8 a.m.	26	1.51
8 a.m.-10 a.m.	30	1.75
10 a.m.-12 p.m.	84	4.89
12 p.m.- 2 p.m.	82	4.77
2 p.m.- 4 p.m.	105	6.11
4 p.m.- 6 p.m.	132	7.68
6 p.m.- 8 p.m.	176	10.07
8 p.m.-10 p.m.	297	17.29
10 p.m.-12 p.m.	306	17.81

OFFICER ASSAULTS BY WEAPON

WEAPONS USED

Statewide, personal weapons such as hands, fist, feet, etc., were used in 78.5 percent of the assaults on officers.

WEAPON	NUMBER	% DISTRIBUTION
Firearm	143	8.32
Knife, Cutting Instrument	79	4.60
Other Dangerous Weapon	148	8.61
Hands, Fist, Feet, Etc.	1,348	78.46

INJURIES TO LAW ENFORCEMENT OFFICERS

In 1978 assaults on law enforcement officers resulted in serious injury in 24 incidents out of every 100.

Injury Status	Number	% Distribution
Injuries	413	24.04
No Injuries	1,305	75.96

CLEARANCE IN ASSAULTS ON LAW ENFORCEMENT OFFICERS

Statewide, 96.33 percent of the assaults on officers were cleared by arrest. This reflects an increase over the 93.4 percent clearance rate in 1977.

Number Assaulted	Number Cleared	Percent Cleared
1,718	1,655	96.33

Total dollar amounts will not equal due to rounding.

1978 Distribution and Clearance Rates For Index Offenses

The percentage of crimes cleared by arrest is obtainable by dividing the number of offenses cleared by the number of offenses known and multiplying the resultant by 100 as:

$$\frac{50 \text{ (robberies cleared)}}{153 \text{ (robberies known)}} \times 100 = 32.67 \text{ percent cleared.}$$

153 (robberies known)

The table below sets forth the percentage of each index crime cleared by arrest during the calendar year 1978.

OFFENSE	NO. OF OFFENSES	PERCENT DISTRIBUTION	NUMBER CLEARED	PERCENT CLEARED
Murder	593	.27	514	86.68
Rape	1,006	.47	634	63.02
Robbery	3,634	1.70	1,199	32.99
Agg. Assault	17,495	8.22	13,617	77.83
Burglary	64,848	30.48	13,187	20.34
Larceny	114,069	53.62	23,560	20.65
MV Theft	11,058	5.19	3,788	34.26

PERCENT OF INDEX OFFENSES CLEARED

CLEARANCE ANALYSIS BY AGE CATEGORY

The graphs below indicate the percent of those offenses that were cleared by arrest or exceptional means by age category. Juvenile clearances are designated by "Under 18" and include only the percentage of all offenses cleared which involved strictly juvenile offenders.

TOTAL INDEX CRIME

VIOLENT CRIME

PROPERTY CRIME

CRIME RATE CALCULATION

Uniform Crime Reporting provides law enforcement executives with a yardstick with which to measure local problems but to utilize this administrative tool, the local data must be converted into terms of rates and percentages.

Perhaps the most used of all crime statistics is the crime rate which generally refers to the number of offenses per 100,000 inhabitants. It can be calculated for any municipality regardless of the size and may be arrived at under either of two procedures. One formula would be to divide the number of crimes by the population and to multiply the answer by 100,000.

Another procedure used particularly when crime rates for a number of different offense classes are to be calculated, is the so-called reciprocal method. Assume that a city has 75,000 inhabitants and 127 robberies and 504 burglaries for the year. Divide 100,000 by the number of inhabitants in the city (75,000). The quotient may be considered the reciprocal and multiplied by the number of crimes in each class to obtain a rate per 100,000. The reciprocal in this instance would be 1.33333 and an illustration of the calculation of the crime rates follows:

Crime Class	No. of Crimes		Reciprocal		Crimes 100,000
Robberies	127	×	1.33333	=	169.3
Burglaries	504	×	1.33333	=	672.0

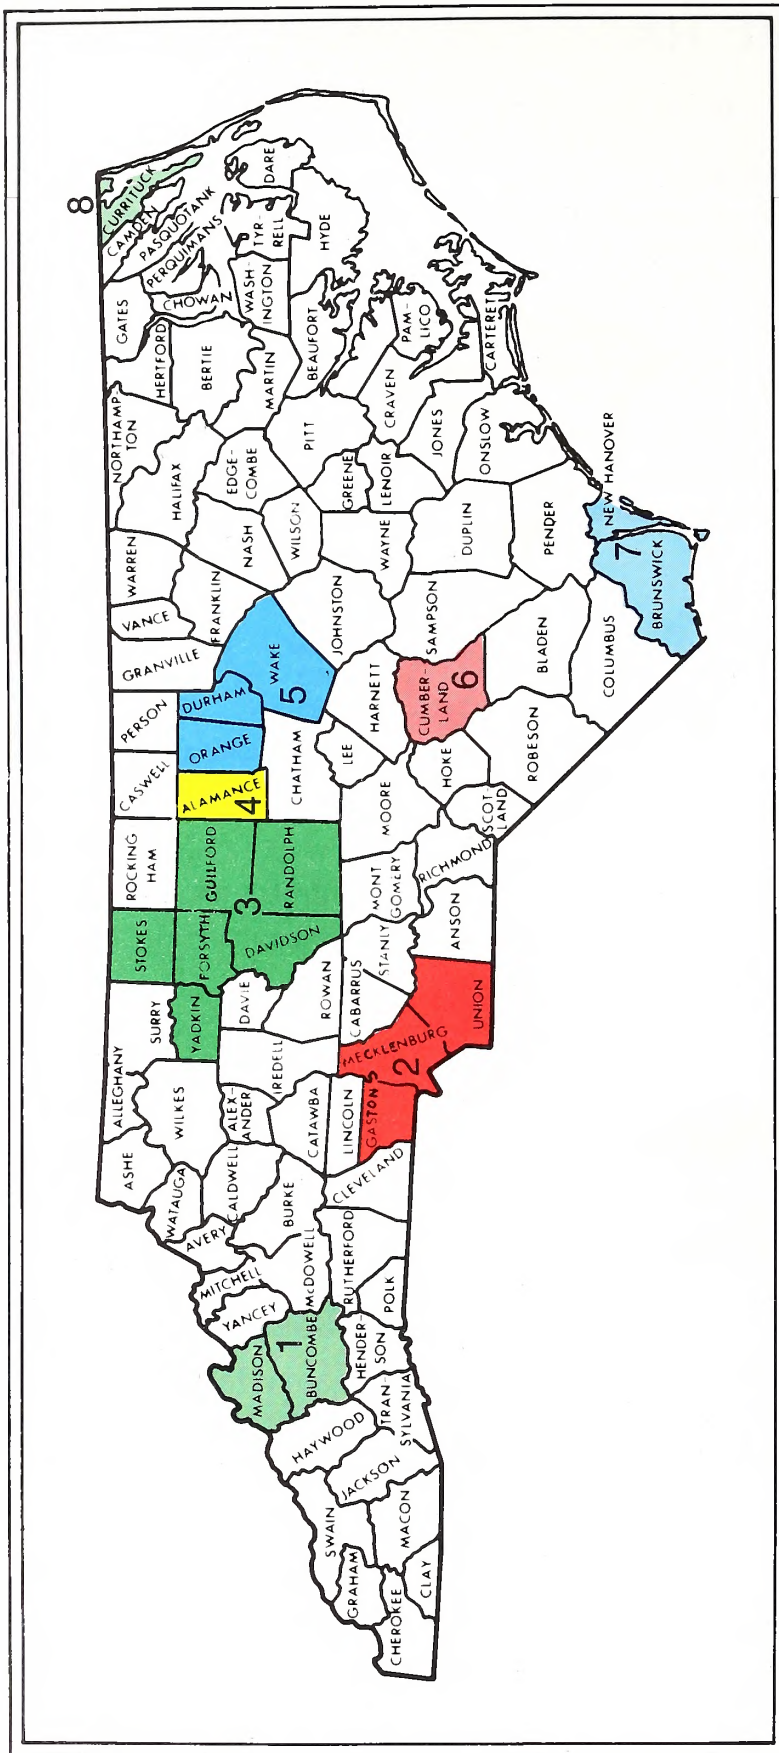

The reciprocal once determined can be used to calculate all rates until a new population figure is available.

1978 NORTH CAROLINA INDEX OFFENSE CRIME RATES*

INDEX OFFENSES	NUMBER OF OFFENSES	RATES PER 100,000 POPULATION
Murder	593	11.03
Rape	1,006	18.71
Robbery	3,634	67.59
Aggravated Assault	17,495	325.41
Burglary	64,848	1,206.17
Larceny	114,069	2,121.68
Motor Vehicle Theft	11,058	205.68
Violent Crime	22,728	422.74
Property Crime	189,975	3,533.54
TOTAL	212,703	3,956.28

*The population figure used for crime rate calculation was 5,369,427, a 1978 estimate provided by the N.C. Dept. of Administration. This estimate reflects the population coverage of the participating agencies rather than of the entire state.

N.C. STANDARD METROPOLITAN STATISTICAL AREAS

LEGEND:

1. Asheville (Buncombe, Madison)
2. Charlotte — Gastonia (Gaston, Mecklenburg, Union)
3. Greensboro — Winston-Salem — High Point (Davidson, Forsyth, Guilford, Randolph, Stokes, Yadkin)
4. Burlington (Alamance)
5. Raleigh — Durham (Durham, Orange, Wake)
6. Fayetteville (Cumberland)
7. Wilmington (Brunswick, New Hanover)
8. Currituck Co. (Part of Norfolk, Virginia Beach, Portsmouth SMSA)

DEDICATION

This book is dedicated to all law enforcement officers and in particular to those law enforcement officers who were feloniously killed while endeavoring to uphold the laws and serving the citizens of North Carolina in the interest of all mankind. The following man gave his life to this cause in 1978 on the date specified.

**Patrolman James W. Nunalee
Wilmington Police Department
Wilmington, N.C.
April 4, 1978**

3 3091 00788 3614

Date Due

AUG 11 1990
